

VERSION 1.0 - PRODUCTION CANDIDATE

Arabic Workbook

العربية

Writing and pronunciation foundations, core grammar, 1,000 audited vocabulary entries, and 1,000 curated bilingual practice sentences with handwriting and retrieval space.

Sentences 376-500

Natural, idiomatic learner language takes priority over artificial uniqueness. Genuine homographs are retained when their learner meaning and grammatical role differ. A source-backed pronunciation key is taught in Foundations; sentence drills then use normal target-language spelling rather than inconsistent ad-hoc romanization.

Practice sentences 376-500

Read the target sentence, cover the English, retrieve the meaning, then reproduce the target sentence. A-D labels are internal length/usefulness progression bands, not CEFR certifications.

B · 376

ما فعلته أنت كان خاطئًا.

What you did was wrong.

Sources, licensing, and QA scope

Vocabulary: drawn from this repository's canonical audited top-1,000 deck for the language. Repository source and audit records remain the source of truth.

Sentence provenance: Arabic and French sentence pairs originate from the ManyThings bilingual exports of the Tatoeba Project and retain their supplied sentence-level attribution under CC BY 2.0 France. Urdu v1.0 uses UALIS Publishing original controlled learner sentences; those rows carry UALIS source provenance and are not represented as third-party Tatoeba quotations.

Editorial curation: the sentence corpus is rendered from the versioned v1.0 row-decision ledger for each language. KEEP rows retain the audited pair exactly; approved corrections retain the row's original source provenance and are marked as editorial adaptations.

Pronunciation foundations: broad-IPA and articulatory guidance was cross-checked against Karin C. Ryding, *A Reference Grammar of Modern Standard Arabic*; Bernard Tranel, *The Sounds of French*; Saleem et al., *Urdu Consonantal and Vocalic Sounds*; and the Omniglot Urdu-script reference. These are broad learner reference targets, not a claim of one accent-free realization.

Quality scope: release gates check canonical dataset integrity, exact row-decision alignment, duplicate handling, source provenance, applicable external-license attribution, PDF structure, font support, and renderability. These controls materially reduce release risk but do not substitute for independent native-speaker certification; no absolute error-free claim is made.
