

VERSION 1.0 - PRODUCTION CANDIDATE

French Workbook

Français

Writing foundations, core grammar, 1,000 audited vocabulary entries, and 1,000 human-contributed bilingual practice sentences with handwriting and retrieval space.

Complete master

Natural, idiomatic learner language takes priority over artificial uniqueness. Genuine homographs are retained when their learner meaning and grammatical role differ.

Transliteration is intentionally omitted from sentence drills rather than teaching inconsistent ad-hoc romanization.

Foundations

Target register: contemporary standard French. These pages orient deliberate practice; the vocabulary and sentence sections provide the bulk of retrieval work.

Script / alphabet reference

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Use this as a compact reference, then practice connected words rather than isolated shapes alone.

Numbers 0-10

0 1 2 3 4 5 6 7 8 9 10

**zéro · un · deux · trois · quatre · cinq · six · sept · huit
· neuf · dix**

Articles and gender

French nouns have grammatical gender. Learn a noun with its article whenever practical because article and adjective forms depend on gender and number.

Agreement

Many adjectives and past participles change form according to gender and number. Do not infer pronunciation changes from spelling changes automatically.

Verb system

High-frequency verbs are often irregular. Learn common present forms early, then build passé composé, imperfect, future, and conditional patterns around real sentences.

Negation

Standard written French commonly uses *ne ... pas* around a finite verb. In informal speech, *ne* is often omitted, but the workbook keeps standard forms unless a source sentence naturally reflects conversational usage.

Questions

Questions can use intonation, *est-ce que*, or inversion. Register and context determine which sounds most natural.

Pronouns

Object pronouns normally appear before the finite verb. Their order is fixed, so learn common combinations as chunks rather than translating word by word.

Handwriting warm-up

Copy five useful words from today's lesson, then write them again from memory.

Vocabulary 1-250

Cover the meaning, retrieve it, then write the target item from memory. Legitimate homographs may recur only when learner meaning and grammatical role differ.

Vocabulary: drawn from this repository's canonical audited top-1,000 deck for the language. Repository source and audit records remain the source of truth.

Sentences: selected from the ManyThings bilingual exports of the Tatoeba Project. Each redistributed pair retains the supplied sentence-level attribution. Tatoeba textual data is distributed under CC BY 2.0 France.

Quality scope: release gates check canonical dataset integrity, row counts, duplicate handling, script plausibility, source attribution, PDF structure, font embedding, and renderability. These checks materially reduce risk but do not substitute for independent native-speaker editorial certification; no absolute error-free claim is made.
