

VERSION 1.0 - PRODUCTION CANDIDATE

Urdu Workbook

اردو

Writing foundations, core grammar, 1,000 audited vocabulary entries, and 1,000 human-contributed bilingual practice sentences with handwriting and retrieval space.

Sentences 126-250

Natural, idiomatic learner language takes priority over artificial uniqueness. Genuine homographs are retained when their learner meaning and grammatical role differ. Transliteration is intentionally omitted from sentence drills rather than teaching inconsistent ad-hoc romanization.

Practice sentences 126-250

Read the target sentence, cover the English, retrieve the meaning, then reproduce the target sentence. A-D labels are internal length/usefulness progression bands, not CEFR certifications.

A · 126

تم تیراکی نہیں کر سکتے۔

You can't swim.

Sources, licensing, and QA scope

Vocabulary: drawn from this repository's canonical audited top-1,000 deck for the language. Repository source and audit records remain the source of truth.

Sentences: selected from the ManyThings bilingual exports of the Tatoeba Project. Each redistributed pair retains the supplied sentence-level attribution. Tatoeba textual data is distributed under CC BY 2.0 France.

Quality scope: release gates check canonical dataset integrity, row counts, duplicate handling, script plausibility, source attribution, PDF structure, font embedding, and renderability. These checks materially reduce risk but do not substitute for independent native-speaker editorial certification; no absolute error-free claim is made.
