

VERSION 1.0 - PRODUCTION CANDIDATE

French Workbook

Français

Writing foundations, core grammar, 1,000 audited vocabulary entries, and 1,000 curated bilingual practice sentences with handwriting and retrieval space.

Vocabulary 251-500

Natural, idiomatic learner language takes priority over artificial uniqueness. Genuine homographs are retained when their learner meaning and grammatical role differ. Transliteration is intentionally omitted from sentence drills rather than teaching inconsistent ad-hoc romanization.

Vocabulary 251-500

Cover the meaning, retrieve it, then write the target item from memory. Legitimate homographs may recur only when learner meaning and grammatical role differ.

amour

251

love; an oblast in far eastern Russia; its administrative centre is Blagoveshchensk
noun

ouvrir

252

to open; to begin, to initiate; to turn on, to switch on, to put on (of a device or an appliance)

this
pronoun

avocat

500

avocado; lawyer, attorney
noun

pauvre

498

poor, pitiable; lacking, scanty; poor person;
pauper
adjective / noun

Sources, licensing, and QA scope

Vocabulary: drawn from this repository's canonical audited top-1,000 deck for the language. Repository source and audit records remain the source of truth.

Arabic and French sentences: quality-filtered from the ManyThings bilingual exports of the Tatoeba Project, with supplied sentence-level attribution retained under CC BY 2.0 France.

Urdu sentences: original controlled standard-Urdu learner sentences authored for this workbook from reviewed grammar-safe conversation families. They replace a rejected external candidate corpus that failed the release linguistic audit.

Quality scope: release gates check canonical dataset integrity, row counts, duplicate handling, script plausibility, sentence-type balance, source diversity where applicable, blocked Urdu legacy-error patterns, PDF structure, font embedding, and renderability. These checks materially reduce risk but do not substitute for independent native-speaker editorial certification; no absolute error-free claim is made.
